NES Opens New Frontiers in Healthcare

More comprehensive than any other system

A complete re-visioning of how to restore the body to homeostasis.

Covers the Energy Spectrum

NES has discovered that the human body-field deals with a range of energies, including phonic (extremely low-frequency sound), ionic, magnetic, and photonic (light).

Maps the Optimal HBF

The NES-Professional™ provides full treatment guidelines based on the world's only map of the "optimal" human body-field (HBF). During a scan, which takes only seconds, the client's field is compared to the optimal HBF and deviations are noted.

Unfolds the HBF

NES research has shown that the HBF has an innate structure which must be read or "unfolded" in a particular way to get an accurate analysis. The NES-Pro is the only system that encodes this knowledge into its assessment software and reveals the optimal sequence for treatment.

Corrects the HBF

NES, through its Infoceuticals, is the only system to provide direct correction to the body-field instead of indirect (analogue) correction as is provided by homeopathic remedies, herbs, and supplements.

Enhances Other Modalities

The NES-Pro is complementary to any other modality you may already be using and may enhance the effects of other treatments, from chiropractic to nutritional support to acupuncture.

Offers Complete Compatibility

The NES-Pro can be used in conjunction with any pharmaceuticals, herbs, and/or supplements your client may be taking.
